

## HRFE ISSUES ADDRESSED IN THE 10.0 RELEASE

### **8587 – Add E-Verify Information to Employee General Information screen**

The E-Verify Case # and E-Verify Effective Date fields have been added to the General Information tab and they have also been included in the Print Friendly view. These fields are read only and will display the information that resides on the More Information (SDE) section on the PEAEMPL Banner page.

### **8589 – Change to HRFE Citizenship Dropdown (remove UC)**

The UC (Out of Country, Citz Unknown) Citizenship code has been removed from the Citizenship Code dropdown list on the General Information accordion.

### **8829 – Rank data is not displaying correctly by View Date – always shows latest Rank info from PEAFAC**

On the Faculty Rank and Tenure accordion, the Rank information was not appearing correctly. It will now display the correct information based upon the view date.

### **8846 – Rehire: NZRBDTC constraint error when applying a rehire being put into same position they used to hold**

Users were receiving the “**A fatal error has occurred. Contact AITS for specific details**” error when applying a rehire transaction for an employee. This was occurring when the employee used to hold a position/job that had NZADTCP data populated. This issue has been corrected.
