

HRFE ISSUES ADDRESSED IN THE 13.0 RELEASE

1487 - Create/reactivate SFO deduction for New Hires with ZZ Benefit Category (BCat)

New Hires with a B-cat of ZZ (i.e. Unpaid / UA e-class) are not getting the SFO deduction created (or reactivated if a re-hire). This deduction, which is an eligible deduction in Banner for ZZ, should be activated via the New Hire process. Right now the SFO is only set up for E-classes with an M4 or B4 Benefit Category.

1486 – Change language of the new SURS accelerated question

"Is this an accelerated course that: 1) carries the same contact/credit hour load as the full-term unaccelerated version, AND 2) is being offered in the same semester as the unaccelerated version?"

Display of new “accelerated question” in the New Hire and Add a Job wizards:

Is this an accelerated course that:

1) carries the same contact/credit hour load as the full-term unaccelerated version,

AND

2) is being offered in the same semester as the unaccelerated version?

Yes

No

1462 - Factors should always default to 9 for new GA jobs. Old coding defaults 12 in some instances

HRFE is currently using the Employee Leave Category to determine the value of 'Factors' on new GA jobs. This functionality is now obsolete and campuses would like '9' to default all the time for new GA jobs, irrespective of a Y* LCat on the Employee.

1493 – New Job Change Reasons

EJ013 - Position Eliminated

ERC, End Job

OT020 - Supervisor Changed

ERC
