

Mental health has come to the forefront of discussion as an outcome based on the disruption to all our lives due to the COVID19 pandemic.

The University of Illinois at Chicago, the University of Illinois System, and the State of Illinois make available several assistance programs for employees to help you through any difficulties you may be experiencing.

We begin with some Myths and Facts. *

Myth	Fact
Mental health problems don't affect me	Mental health problems are actually very common. Prior to COVID19 suicide is the 10 th leading cause of death in the US, at approximately 41,000 annually, more than double the loss of lives to homicide
Children don't experience mental health problems	Even very young children may show signs of mental health concerns. These mental health concerns are often clinically diagnoseable and can be the product of the interaction of biological, psychological, and social factors. Half of all mental health disorders show 1 st signs before a person turns 14 years old, ¾ begin before age 24.
People with mental health problems are violent and unpredictable	Most people with mental health problems are no more likely to be violent than anyone else. Most people with mental illness are non-violent and only 3-5% of violent acts can be attributed to individuals living with serious mental illness. In fact, people with serious mental illness are over ten times more likely to be victims of violent crime than the general population.
People with mental health problems can snap out of it if they try hard enough	Mental health problems have nothing to do with being lazy or weak and many people need help to get better. Many contributing factors including biological, genes, physical illness, injury, and/or brain chemistry can contribute. Life experiences, trauma, a history of abuse can also contribute, as well as a history of family mental health problems.
I can't do anything for a person with a mental health problem.	Only 44% of adults and less than 20% of children and adolescents receive needed treatment. You can help individuals connect with needed treatment options. You can reach out and show support. You can learn about and share facts about mental health. You can treat them with respect. You can refuse to define them by their diagnosis or use labels.
Prevention doesn't work	You can address known risk factors. You can promote the social emotional well-being of children, adolescents, and adults around you.

Want more information?

If you have any questions or would like to schedule an appointment, contact Geri Biamonte or the Employee Assistance Service at (312) 996 3588

Office of Applied Psychological Services (OAPS)

The Office of Applied Psychological Services (OAPS) is a mental health clinic in the Psychology Department at the University of Illinois at Chicago (UIC). They offer therapy and psychological assessment using approaches that are based on scientific theory and supported by scientific evidence, with an emphasis on cognitive behavioral therapy (CBT) techniques. OAPS serves the UIC community, including faculty, staff, and students, as well as people living or working in the greater Chicago area.

All health plans administered by CMS include coverage for behavioral health services. The following support resources are available free of charge, regardless of what plan you are enrolled in and are available to the general public:

- Optum's Emotional-Support Help Line is available to support anyone who may be experiencing anxiety or stress. The free service can be reached at **(866) 342-6892**, 24 hours a day, seven days a week and is open to all.
- Aetna Resources for LivingSM mental wellbeing services is a crisis support line anyone can access.
 - Aetna Medicare members, call 1-866-370-4842 (TTY: 711)
 - Non-Aetna Medicare members, call 1-833-327-2386 (TTY: 711)

The Employee Assistance Program (EAP) provides a valuable resource for support and information during difficult times. The EAP is a free, voluntary, and confidential program that provides problem identification, counseling, and referral services for employees and their covered dependents regardless of the health plan chosen. Employees will be directed to counseling services to assist them with a variety of concerns, including, but not limited to:

- Anger management
- Anxious feelings
- Conflict at work or home
- Domestic violence
- Elder-care issues
- Family/parenting issues
- Feelings of worry or the blues
- Financial concerns
- Grief/loss
- Pre- and post-natal concerns
- Problems with alcohol or drugs
- Stress

All calls and counseling sessions are confidential, except as required by law. No information will be disclosed unless written consent is given. Management consultation is available when an employee's personal problems are causing a decline in work performance. Critical Incident Stress Management is also available through the EAP. For further information regarding the EAP, refer to page 39 of the Benefits Handbook.

Eligibility

- Active employees and their eligible dependents participating in the State Employees Group Insurance Program may access this benefit.
- Active employees, full-time and part-time (50% or greater), who have elected not to participate
 in the health, dental, and vision coverage of the State Employees Group Insurance Program may
